

## Abstract

A system for providing one or more interactive applications to one or more users via a wireless communications network, the system including: one or more servers cooperating with the network to substantially deliver one or more interactive applications to one or more wireless access devices each corresponding to at least one of the users; wherein, after the one or more wireless access devices receive the substantially delivered one or more applications, upon request of one of the users the one or more corresponding wireless access devices receives communication from the server to facilitate the one of the users accessing the one or more interactive applications using the corresponding wireless access device.
